Liang Shi

Curriculum Vitae

ICT, CAS Beijing, China ☑ liang.shi@vipl.ict.ac.cn shiliang26.github.io

I'm a M.Eng student at Institute of Computing Technology, Chinese Academy of Sciences. I'm interested in designing intelligent algorithms that generalizes across various settings. My current research focuses on the ability of visual foundation models to enhance generalization, with applications in Deepfakes detection and trustworthy machine learning.

Education

2021 - Master of Engineering in Computer Science, Institute of Computing Technology,

Present Chinese Academy of Sciences

Advised by: Prof. Jie Zhang

2017 - 2021 Bachelor of Engineering in Computer Science and Technology, University of

Chinese Academy of Sciences

Thesis advised by: Prof. Jie Zhang, Prof. Shiguang Shan

Experience

2020 - Research Assistant, Visual Information Processing and Learning Group (VIPL),

Present Institute of Computing Technology, CAS

- O Advised by Prof. Jie Zhang and Prof. Shiguang Shan
- O Completed undergraduate thesis on cross-domain deepfake detection.
- O Participated in the development of a programming-based online Al course.
- Studying visual foundation models and their application on robust deepfake detection.
- Studying trustworthy text-to-image models.

Aug. 2020 - Visiting Student, University of California, Berkeley

Dec. 2020

- Part of Berkeley's GLOBE visiting student program.
- Completed graduate-level courses on Reinforcement Learning (CS285) and Neural Computation (VS265).

Aug. 2019 - Research Assistant, National Laboratory of Pattern Recognition, Institute of

Apr. 2020 Automation, CAS

- Advised by Prof. Shan Yu.
- O Led a project that studied group decision-making behaviors using the theory of selforganized criticality.
- Developed an online platform for collecting real-world data of group decision-making.

Publications

Under review Real Face Foundation Representation Learning for Generalized Deepfake Detection.

Liang Shi, Jie Zhang, Zhifeng Ji, Jinfeng Bai, Shiguang Shan. In Submission.

Under review An Adapter-based Method and Model for Deepfake Detection of Specific Identities

Liang Shi, Jie Zhang, Shiguang Shan, et al. Patent In Submission.

FG 2021 Unknown Aware Feature Learning for Face Forgery Detection.

Liang Shi, Jie Zhang, Chenyue Liang, Shiguang Shan. *International Conference on Automatic Face and Gesture Recognition, 2021.*

Honors & Awards

2017 - 2021 Annual Scholarship for Students with Disabilities

Haidian Disabled Persons' Federation, Beijing, China

2021 E Fund Scholarship for Incoming Graduate Students

Institute of Computing Technology, Chinese Academy of Sciences (12 / 400)

2021 Outstanding Undergraduate Thesis

University of Chinese Academy of Sciences (9 / 112)

2020 Undergraduate Scholarships

University of Chinese Academy of Sciences (Top 35%)

2019 Undergraduate Scholarships

University of Chinese Academy of Sciences (Top 35%)
